

**4 THINGS
YOU PROBABLY
NEVER KNEW
YOUR MOBILE
PHONE COULD DO**

There are a few things that can be done in times of grave emergencies. Your mobile phone can actually be a lifesaver or an emergency tool for survival. Check out the things that you can do with it:

Emergency

The Emergency Number worldwide for a Mobile is **112**. If you find yourself out of the coverage area of your mobile network and there is an emergency, dial 112 and the mobile will search any existing network to establish the emergency number for you. Interestingly, this number 112 can be dialled, even if the keypad is locked. Try it out.

Have you locked your keys in the car?

Does your car have a remote keyless entry? This may come in handy some day. Good reason to own a mobile phone. If you lock your keys in the car and the spare keys are at home, call someone at home on their mobile phone from your mobile phone.

Hold your mobile phone about a foot from your car door and have the person at your home press the unlock button, holding it near the mobile phone on their end. Your car will unlock. Saves someone from having to drive your keys to you. Distance is no object. You could be hundreds of miles away, and if you can reach someone who has the other 'remote' for your car, you can unlock the doors (or the boot).

Hidden Battery Power

Imagine your mobile battery is very low. To activate, press the keys ***3370#** Your mobile will restart with this reserve and the instrument will show a 50% increase in battery. This reserve will get charged when you charge your mobile next time.

People will forget what you did,
People will forget what you said,
but people will never forget
how you made them feel.

How to disable a STOLEN mobile phone?

To check your Mobile phone's serial number, key in the following digits on your phone ***#06#**

A 15 digit code will appear on the screen. This number is unique to your handset. Write it down and keep it somewhere safe. When your phone is stolen, you can phone your service provider and give them this code. They will then be able to block your handset, so even if the thief changes the SIM card, your phone will be totally useless. You probably won't get your phone back, but at least you know that whoever stole it can't use/sell it either. If everybody does this, there would be no point in people stealing mobile phones.

Pass this on to your family and friends

I was having trouble with my computer. So I called Eric, the 11 year old who lives next door, whose bedroom looks like Mission Control and asked him to come over. Eric clicked a couple of buttons and solved the problem. As he was walking away, I called after him, 'So, what was wrong?'

He replied, 'It was an ID ten T error.' I didn't want to appear stupid, but nonetheless inquired, 'An ID ten T error? What's that? In case I need to fix it again.'

Eric grinned.... 'Haven't you ever heard of an ID ten T error before?'

'No,' I replied.

'Write it down,' he said, 'and I think you'll figure it out.'

So I wrote down: **ID 10 T**

'And Spring arose on the garden fair,
Like the Spirit of Love felt everywhere;
And each flower and herb on Earth's dark breast
rose from the dreams of its wintry rest.'
Shelley

No matter how long the winter, spring is sure to follow
